WORK EXPERIENCES

Software Engineer Intern | Internship

Feb 2026 - May 2026

VyomX

Hybrid • Pune, India

- **Architected and delivered over 8 end-to-end modules** for a scalable children's EdTech platform, including Flashcards, Phonics, Games, Drawing Canvas, and Storytelling, achieving **100% on-time delivery**.
- **Designed and developed a comprehensive Admin Dashboard** with CRUD operations to manage Users, Books, and Subscriptions across the platform.
- **Integrated cloud storage** for multimedia assets (images, PDFs, audio) and **enhanced platform performance** through agile collaboration and effective bug fixing.

Technologies / Skills Used : React, Node.js, Express, Flask, MongoDB, Tailwind CSS, cloudinary, github

Intern | Internship

Jun 2023 - Jul 2023

Cyber Sanskar

Hybrid • Nashik < India

- **Developed an Android mobile app** for a general store using **Java**, enhancing **inventory tracking** and **user experience**.
- Acquired hands-on experience in **agile development**, **REST API integration**, and **mobile application architecture**.

Technologies / Skills Used : Java, Android Development, Github, JQuery

PROJECTS

ZEN- Mental Health Support APP | GitHub

Developer

- **Engineered a production-ready RAG-based mental health chatbot** using **LangChain** and **Llama 3.70b**, implementing conversational memory, prompt chaining, and context-aware response generation with MongoDB for secure data storage and JWT authentication.
- **Optimized LLM response quality** through few-shot and chain-of-thought prompt engineering; designed multi-turn conversation flow using LangChain memory modules for personalized interactions.
- **Built responsive UI** with **Chart.js** for mood tracking visualizations, enhancing mental health monitoring and user engagement.

Technologies / Tools Used : LangChain, Llama 3.70b, MongoDB, Chart.js, React, Node.js, Express

BizMind AI: Autonomous Business Intelligence Agent for Small Businesses | GitHub Website

Solo Project

- **Built an end-to-end GenAI pipeline** that ingests raw CSV sales data and orchestrates a LangChain multi-tool agent with 5 specialized tools — Trend Analyzer, Anomaly Detector, Restock Predictor, Revenue Forecaster, and RAG-based Insight Generator — **delivering actionable BI for small businesses**.
- **Implemented RAG using FAISS vector store** and HuggingFace embeddings (all-MiniLM-L6-v2), enabling natural language querying over business data with context-aware responses powered by Open source LLM.
- **Designed a Streamlit dashboard** with Plotly visualizations, multilingual output (Hindi + English), automated PDF report generation via ReportLab, and real-time restock alerts — targeting **63M+ underserved small businesses in India**.

Technologies / Tools Used : Python, LangChain, FAISS, Streamlit, Plotly

SKILLS

Programming Languages :	Python, Java, JavaScript, TypeScript, SQL
Frameworks & Libraries :	React, Node.js, Express, Flask, Tailwind CSS
Databases :	MongoDB, PostgreSQL, MySQL
Tools & Platforms :	Docker, Git, GitHub, Postman, REST APIs, AWS, Linux

EDUCATIONS

International Institute of Information Technology, Pune

May 2027

B.E. in Information Technology

CGPA : 9/10

- B.E. in Information Technology, **International Institute of Information Technology, Pune**, Expected May 2027

Mahavir Polytechnic, Nashik

Jun 2021 - May 2024

Diploma in Information Technology

Aggregate : 90.69%

- Diploma in Information Technology, **Mahavir Polytechnic, Nashik**,
